

PROJECT ALTFINATOR

The objective of ALTFINATOR is to facilitate and improve innovative SMEs Access to alternative finance (i.e. other than bank finance, like crowdfunding, peer-to-peer lending, invoice trading, business angels, etc.) through capacity building of the financial ecosystem and its participants in the countries where the potential for improvement is the highest (South-Europe and Central and Eastern Europe).

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 792040

01 The Challenge

The Challenge of the ALTFINATOR project is to improve innovative SME's access to alternative forms of finance and absorb the potential emerging new forms (i.e. ICO) empowered by innovative financial technologies.

ALTFINATOR intends to create the conditions for SME's expansion by addressing the financial gap.

02 The Solution

The project will design, develop and implement a capacity-building strategy to increase the capacity of the financial ecosystem and its participants in South, Central and Eastern European countries for provision and absorption of alternative forms of financing for SMEs.

03 Impacts

The real long-term impact on a country's and European economic performance can be perceived when the innovative SMEs scale and expand their operations. ALTFINATOR will increase the competitiveness and growth of European innovative SMEs.

Besides, the project will provide cross-European information architecture with materials resources and online tools for capacity-building and matching of innovative SMEs to alternative finance schemes and their providers.
